

SAFETY NETTING

CONSTRUCTION NETTING SYSTEMS

The construction industry is a common source of safety incidents, with dangerous equipment and high-risk work at heights. Our construction netting offers a solution to help protect employees, the public and your liability when working at heights. Our debris netting and personal safety netting allow workers to move about construction sites with ease, with netting in place to catch large and small debris.

Expect exceptional customer service with a response time under 48 hours and on-demand delivery.

Meet multiple safety compliance needs with one customizable system at a competitive price.

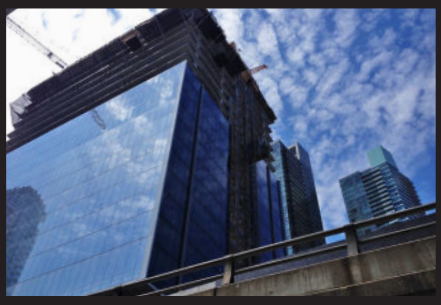

Engineered systems that meet and exceed all specification and safety regulation requirements.

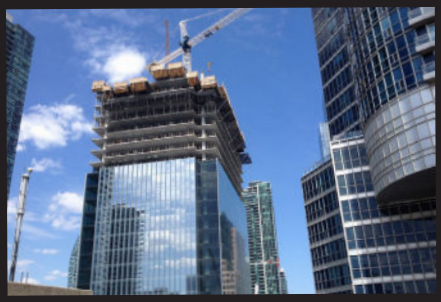

Protects employees and visitors from injury or death from falling objects.

CONSTRUCTION SAFETY NETTING SYSTEM

An “engineered” system consisting of custom-fitted netting panels and rigging hardware.

SAFETY STANDARDS MET BY NETTING SYSTEMS

- OHSA — OHSA 12.10
- ANSI — ANSI A10.11
- NFPA — NFPA 701 Fire Protection
- FDA — FDA Approved

Liftsafe Fall Protection can provide construction netting products designed specifically for multiple construction applications. Our heavy-duty netting can support high-rise construction, debris containment, and more. Liftsafe provides netting that meets the strict ISO 9001 and ANSI 10.11 safety standards to ensure the highest product quality. Bring your job site into compliance with OSHA and ANSI-rated safety systems that are tested and proven safe and effective.

This product is not a fall protection system and is recommended for debris containment to protect against falling objects. Connect with our team to better understand the applications available with our construction netting products.
