

# SAFETY NETTING

# MEZZANINE NETTING SYSTEMS

Liftsafe Fall Protection (LFP) works to keep the health and safety of your facility a top priority. That's why we offer custom Mezzanine Netting Systems to ensure optimal safety while working on or under mezzanines. Our systems allow workers to safely access equipment without the risk of falling objects, while maximizing space and efficiency.

Expect exceptional customer service with a response time under 48 hours and on-demand delivery.

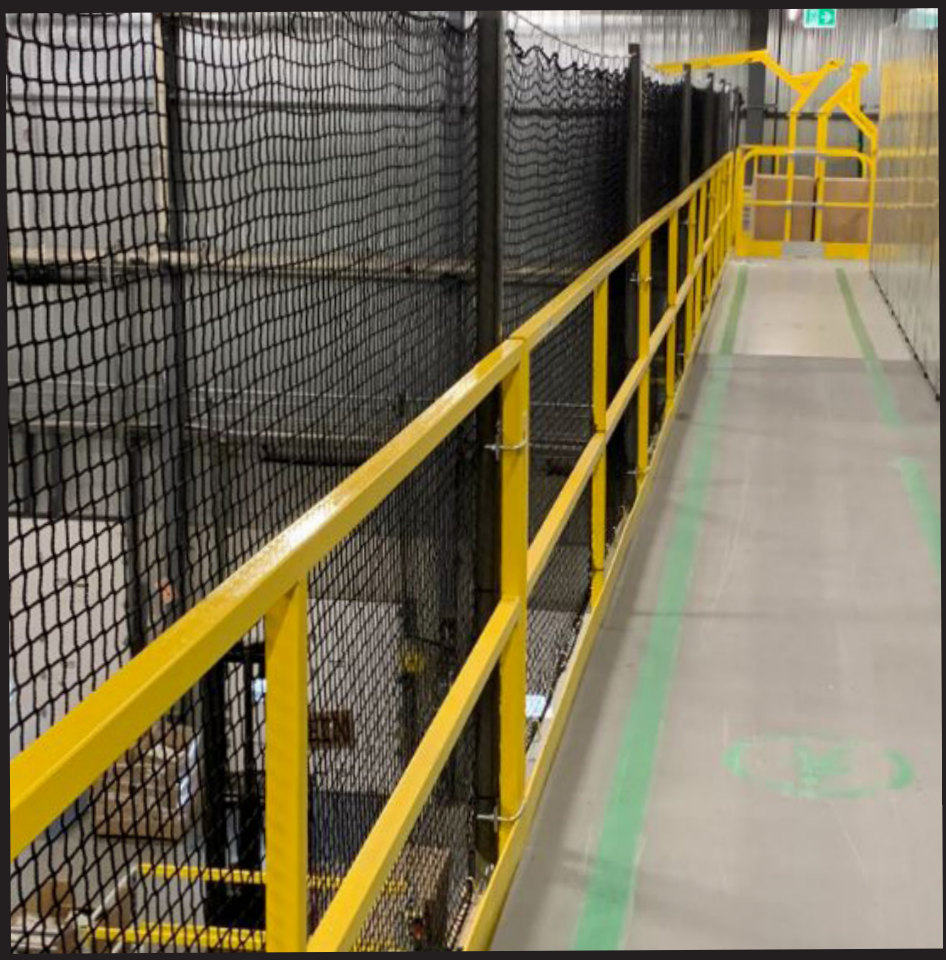

Meet multiple safety compliance needs with one customizable system at a competitive price.

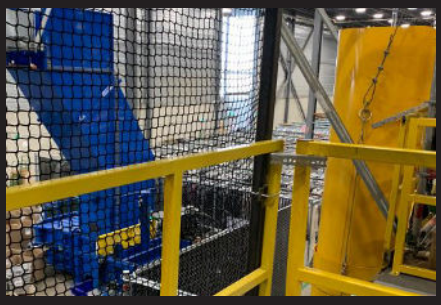

Engineered systems that meet and exceed all specification and safety regulation requirements.

Protects employees and visitors from injury or death from falling objects.

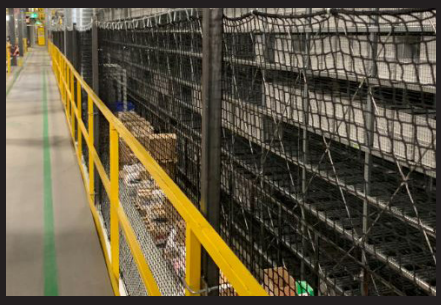

# MEZZANINE SAFETY NETTING SYSTEM

An “engineered” system consisting of custom-fitted netting panels, rigging hardware and brackets.

## SAFETY STANDARDS MET BY NETTING SYSTEMS

- OHSA — OHSA 12.10
- ANSI — ANSI A10.11
- NFPA — NFPA 701 Fire Protection
- FDA — FDA Approved

Mezzanines can be a hazard to workers below. Attaching safety netting to the guard rails that surround the perimeter creates a safety barrier to protect workers. Our mezzanine netting system is an engineered “system” consisting of load-rated netting panels, custom engineered brackets, and related rigging hardware. Each netting panel is custom-made to accurately fit your mezzanine space, and LFP offers multiple netting materials for different load requirements depending on the facility.
